

“SNOOZLE”

PRODUCT	Overall Description	Kiln Dried Pine Sawdust of less than 0.6mm in thickness and varying lengths up to 15mm. The sawdust is dust-reduced and packed in 25 litre 100um x 600mm x 450mm, heat sealed Plastic bags with labels and barcodes affixed.
	Timber Source	Non chemically treated plantation softwood (Pinus Radiata) from managed forests certified to the Australian Forestry Standard AS 4708 and globally recognised by PEFC. Chain of Custody certified to minimum 70% AFS and certified in compliance with Australian Standard 4707:2006 delivered to our warehouse in Midvale from plantations in Bell Bay Tasmania or Dardanup Western Australia.
	Kiln Drying of Timber	Heat treated in accordance with the requirements of the Australian Wood Packaging Certification Scheme with a core temperature greater than 56 degrees Centigrade and for a duration of not less than 30 minutes.

MANUFACTURING	Processing	The raw pine is passed through a Leader Mac moulding machine which systematically shaves it to a thickness of less than 0.6 mm and varying lengths of 4 to 100 mm with most dust being extracted during the process. The shavings greater than 15mm are screened off and utilised for other purposes (“Snoozle Plus”). The sawdust is packed into 25 litre Plastic bags, 100um x 600mm x 450mm which are then heat sealed.
	Appearance	The sawdust is light cream in colour with some slight difference in shading associated with the natural timber knots. To facilitate the shaving process it is sometimes necessary to oil the path through which the wood passes and if this is necessary food grade canola or rice bran oil is used.
	Packaging	“Snoozle” is sold packed in 100um x 600,mm x 450mm, 25 litre heat sealed Plastic bags
	Volume	Currently sold in 25 litre plastic bags.
	Storage	Raw timber is delivered to our factory in Midvale wrapped in plastic sheeting. It is then stored under cover in a clean, well ventilated area as recommended for the prevention of the growth of any mould until processed and bagged. Once processed the bags are stored within our factory free from moisture and rodents. We do not process any treated pine or other wood products on our premises.

	Usage	"Snoozle" is purchased as bedding for small animals, birds and reptiles by hobbyists.
	Delivery	The product is not classified as Dangerous Goods and is generally delivered to our customers in a covered truck reserved expressly for this purpose.

COMPLIANCE	Flammability	Flammable (Autoignition temperature 220 degrees Celsius). May evolve toxic gases such as carbon oxides and hydrocarbons when burning. Extinguish any fire with water spray or fog.
	Hazchem Code	None allocated.
